

## Thank you for leaving me your tooth!

Thank you for leaving your lost tooth for me! I found it under your pillow.

My, how the time flies. I can hardly believe summer is ending and fall is beginning. I love summertime, but I also love autumn. The leaves turn such pretty colors, all reds and oranges and golds, like the flowers in the garden. My favorite summer flowers are sunflowers, but my favorite autumn flowers are the mums. I think I like the bright red ones the best! When I fly overhead, the whole garden looks like a maze. The other fairies and I make a game of seeing who can find her way out of the maze the fastest. Friends make everything more fun, don't they? And you are my friend.

It's so much nicer to share all the wonderful things in life with friends. Everyone likes different things, and that way you are always learning. That's one of the best things about school, isn't it? Meeting new people, learning new things, reading new books. Of course the books here in Fairyland are very, very small. But the stories are big!

Of course this time of year is also about Halloween, and the holidays. And that means candy. We fairies love candy too, but too many sweets are not good for your teeth. Just remember, a little goes a long way. And don't forget to brush every day, and floss your teeth, too. Taking care of your teeth is important.

Well, I have to fly-- hee, hee. But I just had to write and thank you for adding another flower to my garden. You are so special!

Stay sweet!

Love,

**The Tooth Fairy**
